NOTAS:

Case No.	Case Name	Case Type	Case Status	Case Date	Case Time	Case Location	Case Description	Case Notes	Case Comments
1	John Doe	Medical	Open	2023-01-01	10:00	Room 101	John Doe, 45 years old, male, presented with chest pain and shortness of breath. Initial vital signs: BP 120/80, HR 90, RR 20, SpO2 98% on room air. Physical exam: clear lungs, normal heart sounds, no lower extremity edema. ECG: sinus tachycardia. CXR: clear lungs. Initial diagnosis: anxiety disorder. Patient was reassured and discharged home with instructions to return if symptoms worsen.	Initial assessment and diagnosis. Patient is stable and discharged.	Follow-up appointment scheduled for 2 weeks.
2	Jane Smith	Medical	Closed	2023-01-02	11:30	Room 102	Jane Smith, 60 years old, female, presented with a 2-week history of persistent cough and weight loss. Initial vital signs: BP 110/70, HR 80, RR 18, SpO2 95% on room air. Physical exam: hyperinflated lungs, decreased breath sounds at the bases, no crackles or wheezes. ECG: normal. CXR: hyperinflated lungs, no consolidation. Initial diagnosis: chronic obstructive pulmonary disease (COPD). Patient was started on a long-acting beta-agonist (LABA) and a corticosteroid inhaler. Discharged home with instructions to take medications as prescribed and follow up in 4 weeks.	Diagnosis of COPD confirmed. Patient is stable and discharged.	Follow-up appointment scheduled for 4 weeks.
3	Michael Brown	Medical	Open	2023-01-03	14:00	Room 103	Michael Brown, 30 years old, male, presented with a 3-day history of severe abdominal pain and vomiting. Initial vital signs: BP 90/60, HR 110, RR 22, SpO2 98% on room air. Physical exam: tenderness in the right lower quadrant, no rebound tenderness, no bowel sounds. ECG: sinus tachycardia. CXR: no free air under the diaphragm. Initial diagnosis: acute appendicitis. Patient was admitted to the hospital and scheduled for surgery.	Diagnosis of acute appendicitis confirmed. Patient is stable and discharged.	Follow-up appointment scheduled for 2 weeks.
4	Sarah Johnson	Medical	Closed	2023-01-04	15:30	Room 104	Sarah Johnson, 55 years old, female, presented with a 1-week history of persistent headache and dizziness. Initial vital signs: BP 130/90, HR 80, RR 18, SpO2 98% on room air. Physical exam: normal. ECG: normal. CXR: normal. Initial diagnosis: tension headache. Patient was started on a low-dose tricyclic antidepressant (TCA) and discharged home with instructions to take medications as prescribed and follow up in 4 weeks.	Diagnosis of tension headache confirmed. Patient is stable and discharged.	Follow-up appointment scheduled for 4 weeks.
5	David Wilson	Medical	Open	2023-01-05	16:00	Room 105	David Wilson, 70 years old, male, presented with a 2-week history of persistent cough and weight loss. Initial vital signs: BP 110/70, HR 80, RR 18, SpO2 95% on room air. Physical exam: hyperinflated lungs, decreased breath sounds at the bases, no crackles or wheezes. ECG: normal. CXR: hyperinflated lungs, no consolidation. Initial diagnosis: chronic obstructive pulmonary disease (COPD). Patient was started on a long-acting beta-agonist (LABA) and a corticosteroid inhaler. Discharged home with instructions to take medications as prescribed and follow up in 4 weeks.	Diagnosis of COPD confirmed. Patient is stable and discharged.	Follow-up appointment scheduled for 4 weeks.
6	Emily Davis	Medical	Closed	2023-01-06	17:00	Room 106	Emily Davis, 40 years old, female, presented with a 3-day history of severe abdominal pain and vomiting. Initial vital signs: BP 90/60, HR 110, RR 22, SpO2 98% on room air. Physical exam: tenderness in the right lower quadrant, no rebound tenderness, no bowel sounds. ECG: sinus tachycardia. CXR: no free air under the diaphragm. Initial diagnosis: acute appendicitis. Patient was admitted to the hospital and scheduled for surgery.	Diagnosis of acute appendicitis confirmed. Patient is stable and discharged.	Follow-up appointment scheduled for 2 weeks.
7	Robert Miller	Medical	Open	2023-01-07	18:00	Room 107	Robert Miller, 65 years old, male, presented with a 1-week history of persistent headache and dizziness. Initial vital signs: BP 130/90, HR 80, RR 18, SpO2 98% on room air. Physical exam: normal. ECG: normal. CXR: normal. Initial diagnosis: tension headache. Patient was started on a low-dose tricyclic antidepressant (TCA) and discharged home with instructions to take medications as prescribed and follow up in 4 weeks.	Diagnosis of tension headache confirmed. Patient is stable and discharged.	Follow-up appointment scheduled for 4 weeks.
8	Laura White	Medical	Closed	2023-01-08	19:00	Room 108	Laura White, 50 years old, female, presented with a 2-week history of persistent cough and weight loss. Initial vital signs: BP 110/70, HR 80, RR 18, SpO2 95% on room air. Physical exam: hyperinflated lungs, decreased breath sounds at the bases, no crackles or wheezes. ECG: normal. CXR: hyperinflated lungs, no consolidation. Initial diagnosis: chronic obstructive pulmonary disease (COPD). Patient was started on a long-acting beta-agonist (LABA) and a corticosteroid inhaler. Discharged home with instructions to take medications as prescribed and follow up in 4 weeks.	Diagnosis of COPD confirmed. Patient is stable and discharged.	Follow-up appointment scheduled for 4 weeks.
9	James Taylor	Medical	Open	2023-01-09	20:00	Room 109	James Taylor, 35 years old, male, presented with a 3-day history of severe abdominal pain and vomiting. Initial vital signs: BP 90/60, HR 110, RR 22, SpO2 98% on room air. Physical exam: tenderness in the right lower quadrant, no rebound tenderness, no bowel sounds. ECG: sinus tachycardia. CXR: no free air under the diaphragm. Initial diagnosis: acute appendicitis. Patient was admitted to the hospital and scheduled for surgery.	Diagnosis of acute appendicitis confirmed. Patient is stable and discharged.	Follow-up appointment scheduled for 2 weeks.
10	Maria Garcia	Medical	Closed	2023-01-10	21:00	Room 110	Maria Garcia, 60 years old, female, presented with a 1-week history of persistent headache and dizziness. Initial vital signs: BP 130/90, HR 80, RR 18, SpO2 98% on room air. Physical exam: normal. ECG: normal. CXR: normal. Initial diagnosis: tension headache. Patient was started on a low-dose tricyclic antidepressant (TCA) and discharged home with instructions to take medications as prescribed and follow up in 4 weeks.	Diagnosis of tension headache confirmed. Patient is stable and discharged.	Follow-up appointment scheduled for 4 weeks.
